

## 'Zoom' Video Kit - Recommended kit list needed for church services

As you will be aware there are a significant number of our congregation who, under the current 'shielding' guidelines from the NHS, will be unable to physically attend church services after the lockdown is lifted.

To maintain contact with this group, and others who for various reasons are unable to attend church on a regular basis, at our last PCC meeting we agreed that our benefice should continue to stream services from All Saints' church and on occasions, from St Nicholas and St Giles, after the lockdown is lifted.

The first step was to enabling streaming from all three church locations by purchasing a mobile 4G internet data access Wi-Fi device for an initial contract period of 12 months. This has now been ordered.

Now the next step is to purchase the equipment needed to provide on-going zoom streamed services. This includes purchasing an HD video camera, a 'professional grade' microphone and a video tripod with a fluid head and a height suitable for viewing over the congregation heads. In addition, we will need a 'live' video production switcher/capture device and a church laptop with a second monitor to control and run the broadcast.

It is likely that we will also need a few additional cables and maybe some other sundry parts to link everything together when we put everything together.

*These costs are a guide - availability, specification and prices vary day to day depending on exchange rates.*

Video Camera	Panasonic HC-V770EB	£335.00
Microphone	RØDE Camera and Audio VideoMic	£89.00
Memory Card for camera	Verbatim 44026 Premium SDXC 256GB Memory Card (Class 10)	£28.00

## Blackmagic Atem Mini 4 HDMI Input Live Production Switcher

Blackmagic Design ATEM Mini Production Video Mixer; Live production switchers; USB output for web streaming and HDMI output for on-site presentations; USB output works like a webcam; four HDMI inputs for video sources such as video cameras, computers or DVD player; integrated DVE processor for picture-in-picture effects and DVE transitions in full HD; Broadcast quality transitions including mix, dip and wipe; two stereo audio inputs for connecting table or clip-on microphones.

This is the one piece of essential kit - watch this video (from 30:10) for the full demo & walkthrough of the ATEM mini.....there's about 50 mins of the video to watch but it is well worth the time.
